

Product Information Sheet

Young Stock Bolus for the Supply of Trace Elements and Vitamins for Young Growing Cattle

BOLITRACE YOUNG has been developed as a complementary feed for young growing cattle, to support the preparation of the body for calving and future lactation (support general heifer's growth, mammary gland development, oestrus and reproduction).

- **BOLITRACE YOUNG is administered by 1 or 2 boluses depending on the size of the animal using the specially designed easy to use applicator lance.**
- **1 bolus for animals 200-400kg, 2 boluses for animals 400kg+**

Why Use BOLITRACE YOUNG

- Support the body for calving and future lactation
- Support general heifers growth, mammary gland development, oestrus and reproduction.
- Contribute to maintenance of immune functions
- Support the development of rumen flora with live yeast
- Support the development of the unborn calf

TARGET - Young growing cattle, and in calf cows and heifers.

Boluses contain iodine, copper, manganese, zinc, selenium, cobalt, vitamin A, D3, E and live yeast supplying a regular intake of trace elements and yeast for 180 days.
