

Product Information Sheet

Pre-Insemination Bolus for Dairy, Beef Cows and Heifers to Optimise Fertility Success

BOLIFLASH FERTIL has been developed as a complementary feed for dairy cows to support preparation for oestrus and reproduction, optimising heat expression fertility and conception rates.

- **BOLIFLASH FERTIL is a unique combination of two boluses delivered in a single dose using the specially designed 'easy-to-use' applicator lance.**
- **Bolus one is effervescent acting within 30 minutes. Bolus two is a controlled release bolus, delivering ongoing support for oestrus expression and maintenance of pregnancy.**
- **Range includes boluses for pre and post calving providing a precision livestock approach to support transition health & fertility.**

Why use BOLIFLASH FERTIL?

- **Both fast and slow release boluses in a single dose**
- **Save time and animal handling**
- **Nutritional flushing enhancing heat expression**
- **Preparation of reproductive organs for the next insemination**

TARGET - Herd breeding performance

BOLIFLASH FERTIL is a complementary feed for cows or heifers to support fertility performance. In addition to enhancing heat expression and preparation for AI the anti-oxidant effect reduces risk of embryonic or foetal death. Optimising herd breeding programmes; Natural service, AI or ET.

- **Rich in vitamin E and selenium**
- **Enhanced progesterone production with the inclusion of beta-carotene**
- **Additional vitamins A and D3**
- **A range of additional trace elements (chelated) including copper, manganese and zinc**
- **Administered 15 days prior to insemination**
